## The Sampan

*"The Greatest Disappearing Act Since Houdini "*

**"I heard through the Sampan's music and ...  
imaging to die for, and a speaker  
disappearing act that I wouldn't have believed  
possible."**

(Jeff Rabin, Ph.D., [enjoythemusic.com](http://enjoythemusic.com))

**"... the true stars in the Role firmament are, for  
me..., the Sampans ...We listened, drop-jawed,  
to detail, a seamless soundstage, crisp  
warmth (Oxymoronic? Not in the least), and  
next to no sense of compression or  
congestion at climaxes."**

(David Ogden Stiers)

**"Even a respected Lowther cabinet builder ...  
said he could not believe the quantity and  
quality of bass that was being reproduced  
from such a slim little cabinet."**

(Jeff Rabin, Ph.D., [enjoythemusic.com](http://enjoythemusic.com))

The new Sampan is an innovative combination of transmission line, point source and minimum phase designs. It uses a single driver to reproduce music with incredible coherence and speed. It accurately reproduces the most delicate highs. It's midrange is pristine. It's bass response, surprising. The Sampan preserves wave form of the sound and introduces no distortion to music reproduction! It faithfully reproduces the entire audible spectrum. And its dimensions are astounding: four inches wide, four inches deep and 37 inches high. The Sampan is available in beautiful satin black lacquer and natural wood cabinets.
