Red birch

ABOUT US

Role Audio is all about musical truth. Our loudspeakers recreate an intimately musical world where the physical and emotional qualities of the performance reach you with near full impact.

Role Audio is our vision of what the loudspeaker of tomorrow must be. In order to complement contemporary lifestyles, the loudspeaker of tomorrow must provide large speaker performance in the smallest and most elegant package. This is because in an increasingly stress-filled urbanizing world with ever declining living space, the loudspeaker of tomorrow must be easy to place, easy to use, and must provide a simple stress-free user interface.

We believe that loudspeakers should be seen and not heard. That is, the loudspeaker should not impart its own coloration or characterization to the music. Good loudspeakers should transport you to the original performance and let you feel the emotionalism and spiritualism of the performers. That is why we name our loudspeakers after ships. Good loudspeakers should also disappear when you close your eyes. We design our loudspeakers to disappear sonically to let nothing stand between you and the music.
